\*RDD = recommended daily dose

**Food supplement Imunoglukan P4H<sup>®</sup> liquid is gluten-free.**

### **Information for user:**

The main active ingredient of **Imunoglukan P4H<sup>®</sup>** products is the natural substance Imunoglukan<sup>®</sup> suitably combined with vitamin C.

**Imunoglukan<sup>®</sup>** is highly purified natural substance, the complex of biologically active polysaccharides obtained through the isolation from *Pleurotus ostreatus*. The safety and efficacy of Imunoglukan<sup>®</sup> have been proven in clinical studies and observations published in scientific literature.

Human body is not able to synthesize **vitamin C**, so it is necessary to take it via food. A recommended daily dose of vitamin C is 80 mg. Vitamin C carries out many significant functions in human body, therefore it is essential for life and in maintaining a healthy organism. It affects the metabolism of amino acids and the synthesis of collagen and thus contributes to the proper functioning of blood vessels, bones and cartilages. It is a scavenger of free radicals and thus protects the cells from oxidative stress. Vitamin C in combination with Imunoglukan<sup>®</sup> in **Imunoglukan P4H<sup>®</sup>** products acts synergically, i.e., the effect of these two components is supported via mutual interaction.

**Usage:** **Imunoglukan P4H<sup>®</sup>** is a food supplement for long-term use. It contains natural Imunoglukan<sup>®</sup> and vitamin C which contributes to the normal function of the immune system. Liquid form was specifically developed for children and adults preferring the liquid form of food supplements.

**Recommended dosage Imunoglukan P4H<sup>®</sup> liquid form:** It is recommended to take 1 ml per 5 kg of body weight once per day long-term (at least for 2 - 3 months). In periods of increased stress, an increased dose (2 ml/ 5 kg) can be taken once per day for 3 - 7 days. Take the product ideally in the evening before going to bed or in the morning on an empty stomach. **Shake the bottle thoroughly before each use.**

**Warning:** The recommended dosage must not be exceeded. People with organ transplants must not take this product. People under immunosuppressive treatment can use the preparation only after consulting a treating physician. Food supplements should not be used as a substitute for a varied diet. They are recommended for adults and children from 3 years of age.

**Storage:** Keep out of the reach of children. Store in a dry place at 5°C to 25°C, protect against humidity, freezing and direct sunlight. After opening and each single use the bottle should be properly closed and stored in the refrigerator at 2°C to 8°C. Use within 2 months after opening. Rare and possible occurrence of white clots is caused by long-term storage or by changes in temperature and does not affect the quality and efficacy of the product.

**Packaging:** 120 ml
