

Imunoglukan P4H® lotion

Body milk suitable for:

- Regeneration, hydration, increasing of skin elasticity.
- Skin care after irradiation.
- Dry and atopic skin.

IMUNOGLUKAN® + ARGAN OIL + SHEA BUTTER + MACADAMIA OIL + ALMOND OIL + OLIVE OIL + PANTHENOL + VITAMIN E

No parabens and perfumes.

Skin function, problematic skin:

One of the basic functions of the skin is its barrier function (physical, chemical, biological) that protects us in direct contact with external environmental pollutants. Epithelial cells on the skin's surface form the largest functional and immune barrier of the organism. If this barrier works properly, it protects the skin against water loss and prevents the entry of chemicals and microorganisms into the skin.

Integrity of the skin is often impaired in people with dry, allergic or inflammatory skin diseases. These reduce its defense capabilities against influences of external environment. Affected skin is exposed to continuous influence of external factors such as chemicals, detergents, perfumes, UV, minor injuries and allergens at an increased rate. This leads to increased permeability of the skin to pathogens and the risk of infection.

Normalization of barrier function of the skin can be promoted by the use of products that support healthy keratinization and immune function of the skin. Skin recovery is very important in preventing and slowing down the progression of the above-mentioned skin diseases. In case of problematic skin it is most important to prevent it from drying and thus enhance its barrier function. Local application of preparations containing natural substances (eg. beta-glucan from *Pleurotus ostreatus*) could be an appropriate complement to anti-inflammatory treatment. The application results in stimulation of various types of skin cells (Langerhans cells - dermal macrophages, fibroblasts, and epidermal keratinocytes), and increase of regenerative processes in the skin.

Body milk **Imunoglukan P4H® lotion** is suitable for regeneration, protection and healthy skin care. Its key active ingredient is natural substance Imunoglukan®, produced by patented technology. Imunoglukan® is the complex of biologically active polysaccharides predominantly beta-glucan *pleuran*, which is known as an activator of important skin cells.

Imunoglukan P4H® lotion also contains a mixture of natural vegetable oils (olive, almond, macadamia) that contribute to deep skin nutrition. Along with argan oil and shea butter they improve natural characteristics of the skin (barrier function, smoothness, elasticity).

Panthenol contained in the milk has excellent moisturizing properties and protects the skin against free radicals as well. Together with vitamin E they have anti-inflammatory effects and help improve physiological balance and skin regeneration.

Usage:

Imunoglukan P4H® lotion has regenerating and moisturizing effects. It softens and soothes the skin, promotes its elasticity and helps to maintain it in good condition. It is also suitable after irradiation, for dry and atopic skin. **Imunoglukan P4H® lotion** restores overall integrity of all skin types. It is easy to spread and suitable for daily use also for large skin areas. Apply to skin 2 to 3 times a day.

Consumer information: Do not use the product if you are hypersensitive or allergic to any of the ingredients. In case of topical corticosteroids application apply with a time interval at least 15 minutes.

Storage:

Store in temperature from 5°C to 25°C. Keep out of the reach of children. Protect against freezing and direct sunlight. For external use only.

INGREDIENTS (INCI):

AQUA, PEG-6 STEARATE, PRUNUS AMYGDALUS DULCIS OIL, TRIOLEIN, MACADAMIA TERNIFOLIA SEED OIL, DIMETHICONE, CETEARYL ALCOHOL, BUTYLENE GLYCOL, CETYL PALMITATE, GLYCERYL STEARATE, BUTYROSPERMUM PARKII BUTTER, PANTHENOL, GLYCERYL DIOLEATE, GLYCOL STEARATE, PEG-32 STEARATE, ARGANIA SPINOSA KERNEL OIL, C10-18 TRIGLYCERIDES, TOCOPHERYL ACETATE, BETAGLUCAN, XANTHAN GUM, POLYACRYLATE CROSSPOLYMER-6, DISODIUM EDTA, O-CYMEN-5-OL, GLUCONOLACTONE, SODIUM BENZOATE, CALCIUM GLUCONATE.

Content:

250 ml
