The capsule is of plant origin composed of hydroxypropylmethylcellulose and colourants (Copper complex of chlorophyllins, Titanium dioxide).

*NRV – Nutrient Reference Value

Food supplement Imunoglukan P4H® capsules is gluten-free.

Information for user:

The main active ingredient of **Imunoglukan P4H®** products is the natural substance Imunoglukan® suitably combined with vitamin C.

Imunoglukan® is highly purified natural substance, the complex of biologically active polysaccharides obtained through the isolation from *Pleurotus ostreatus*. The safety and efficacy of Imunoglukan® have been proven in clinical studies and observations published in scientific literature.

Human body is not able to synthesize **vitamin C**, so it is necessary to take it via food. A nutrient reference value of vitamin C is 80 mg. Vitamin C carries out many significant functions in human body, therefore it is essential for life and in maintaining a healthy organism. It affects the metabolism of amino acids and the synthesis of collagen and thus contributes to the proper functioning of blood vessels, bones and cartilages. It is a scavenger of free radicals and thus protects the cells from oxidative stress. Vitamin C in combination with Imunoglukan® in **Imunoglukan P4H®** products acts synergically, i.e., the effect of these two components is supported via mutual interaction.

Usage: **Imunoglukan P4H®** is a food supplement for long-term use. It contains natural Imunoglukan® and vitamin C which contributes to the normal function of the immune system. Liquid form was specifically developed for children and adults preferring the liquid form of food supplements.

Recommended dosage Imunoglukan P4H® capsules: It is recommended to take 1 to 3 capsules once per day long-term (at least for 2–3 months). Capsules should be swallowed in one piece and washed down with adequate amount of water ideally in the evening before going to bed or in the morning on an empty stomach. The content of the capsule can be emptied on a spoon if necessary, and taken this way.

Warning: The recommended dosage must not be exceeded. People with organ transplants must not take this product. People under immunosuppressive treatment can use the preparation only after the consultation with a treating physician. Food supplements should not be used as a substitute for a varied diet. They are recommended for adults and children from 3 years of age.

Storage: Keep out of the reach of children. Store in a dry place at 5°C to 25°C, protect against humidity, freezing and direct sunlight.

Packaging: 30 capsules
